

# Do the Math!

The average cost of a pack of cigarettes in the U.S. is **\$6.00**.

How much would you be spending?

**1 Pack a Day =**

**\$42 a week**  
**\$180 a month**  
**\$2,190 a year**

**1.5 Packs a Day =**

**\$63 a week**  
**\$270 a month**  
**\$3,285 a year**

**2 Packs a Day =**

**\$84 a week**  
**\$360 a month**  
**\$4,380 a year**

Wouldn't you rather have the cash?

Two things I will do with the extra cash when I choose to never smoke:

1. \_\_\_\_\_

2. \_\_\_\_\_
